

Internship curriculum for practical semesters

Internship curriculum of the Faculty Computer Science for the practical semester of the Bachelor degree course COMPUTER SCIENCE

Practical semester

Takes place: 5th semester
Duration: 20 weeks

Internship

Training objective:

- Being instructed in independent and responsible work
- Being introduced to the professional domain by participating as independently and responsibly as possible in data processing projects
- Acquiring specific knowledge of data processing and other technical fields
- Expanding and acquiring in-depth knowledge of the organizational problem solving of the company

Training content:

The students should work as independently as possible in the fields of analysis, design and the execution of technical processes.

In the scope of data processing projects independent and responsible participation in various project stages (system analysis, system planning, conception, design, implementation, introduction and customer engineering) is to be made possible.
